Hi Sarah,

I have not connected with Roger. I sent a note and voicemail but haven't had the discussion with him and also George Bridgers at the HQ modeling group. I'm planning to send an appointment for next week and send along a summary sheet of information. I did have a lengthy discussion with Steve Perry (ORD) who is one of the principal developers of CTDMPlus. It was very informative and Steve will be a good resource going forward, if needed. However, some judgement calls remain.

I also had a call from Jeff Bennett, the consultant on the project, last Friday afternoon. He verbalized a lot of information and just yesterday sent some maps that are helpful.

Bottom line is I still have some questions about their use the off-location meteorological tower/data. That's something that I think our HQ modeling group contacts can assist with.

Randy

Good afternoon all,

Randy – did you have a chance to connect with Roger?

Thank you.

Sarah
